Tony,

Just a thought, we might consider installing a filter for comms out to the enterprise. I mean when I read the below email to Ken Ohmen I hear us saying TCEB audit finding XX in a pretty cavalier tone.

Good Morning,

I have combed the shop floor and found that material was placed in the wrong bin. I also discovered an additional quantity that I was able to tie back to another 1348. I have gone into PDREP and updated it.

Please let me know if you require any additional information

Thank you for your assistance

V/r,

Tony,

Received 280, inspected 10, 235 deficient. What happened to the other 45?

For info of all. This is used internal to the VSS.
